

```
#include <stdio.h>

int main()
{
    int hour1, minutel;
    int hour2, minute2;

    scanf("%d %d", &hour1, &minutel);
    scanf("%d %d", &hour2, &minute2);

    int ih = hour2 - hour1;
    int im = minute2 - minutel;
    if ( im < 0 ) {
        im = 60 + im;
        ih --;
    }
    printf("时间差是%d小时%d分。\\n", ih, im);
    return 0;
}
```
