

```
#include <stdio.h>

int main()
{
    int hour1, minute1;
    int hour2, minute2;

    scanf("%d %d", &hour1, &minute1);
    scanf("%d %d", &hour2, &minute2);

    int t1 = hour1 * 60 + minute1;
    int t2 = hour2 * 60 + minute2;

    int t = t2-t1;

    printf("时间差是%d小时%d分。", t/60, t%60);

    return 0;
}
```
